Comparative Statement may be forwarded to appropriate authority depending on the value of the work as applicable as per existing norms and guidelines under AMRUT programme.
- v. Uploading of summary list of technically qualified bidders.
- vi. Pursuant to scrutiny and decision of the screening committee the summary list of eligible Bidder and for which their proposal will be considered and uploaded in the web portals.
- vii. While evaluation, the committee may summon the bidders and seek clarification / information or additional documents or original hard copy of any of the documents already submitted and if these are not produced within the stipulated time frame, their proposals will be liable to rejection.

C. Financial proposal

As per SI. 11, Bid Price / Price Schedule. To be uploaded Digitally signed by the Bidder.

The audited Balance sheet for the last five years, net worth bid capacity etc. are to be submitted which must demonstrate the soundness of Bidder financial position, showing long term profitability including an estimated financial projection of the next two years.

7. Penalty for suppression / distortion of acts

Submission of false document by Bidder is strictly prohibited and in case of such act by the Bidder the same may be referred to the appropriate authority for prosecution alongwith with forfeiture of earnest money forthwith.

8. Rejection of Bid

The Employer (Bid accepting authority) reserves the right to accept or reject any Bid and to cancel the Bidding processes and reject all Bids at any time prior to the award of Contract without thereby incurring any liability to the affected Bidder or Bidders or any obligation to inform the affected Bidder or Bidders of the ground for Employer's (Bid accepting authority) action. The Bidder whose Bid has been accepted will be notified by the Bid Inviting and Accepting Authority through acceptance letter/ Letter of Acceptance. The Letter of Acceptance will constitute the formation of the Contract.

The Agreement in Printed Bid Form (form no. 2911) will incorporate all necessary documents, e.g. e-NIT., all addenda-corrigendum, different filled-up forms (Section –B), Price Schedule and the same will be executed between the Bid Accepting Authority and the successful Bidder.

Date: -	Signature of applicant including title
	and canacity in which application is made

Declaration of the Bidder

(Affidavit to be affirmed on a Non Judicial Stamp Paper of Rs. 10/- and enclosed with the Bid documents which is required to be submitted in time duly)
I,, son of
years by
occupation do hereby solemnly affirm and confirm as follow:
1. That, I am the Of have
duly authorized by and competent to affirm this affidavit on behalf of the said Bidder.
2. That, I have inspected the site of work covered under e-NIT (eNIT No)
circulated through Office memo bearing Nodateddated
and have made myself fully acquainted with the site conditions existing level/proposed
level and local conditions in and around the site of work. I have also carefully and
meticulously gone through the Bid documents. Bid of the above named Bidder is offered and submitted upon due consideration of all factors and if the same is accepted, I on and
- behalf of the a-esaid Bidder, being lawfully and duly authorized, promise to abide by all
the covenants, conditions and stipulations of the Contractual documents and to carry
out, complete the works to the satisfaction of the Bid accepting Authority of the Work
and abide by all instructions as may given by the Engineer in Charge of the work time to
time. I also hereby undertake to abide by the provisions of Law including the provisions
of Contract Labour (Regulation & Abolition) Act, Apprentice Act 1961, West Bengal Sales
Tax Act, VAT Act, Income Tax Act as would be applicable to the Contractor upon entering
into -mal Contract / agreement with the Bid Inviting/Accepting authority.
3. That I declare that, no relevant information as required to be furnished by the
Bidder has been suppressed in the Bid documents.
4. That the statement above made by me is true to my knowledge
 That the statement above made by me is true to my knowledge. That all Documents submitted by me are genuine, authentic, true and valid.
6) That all information furnished are true to the best of my knowledge & behalf.
Department has got full right to cancel the same with penal measure, if any, in case any
of the statements is proved to be false.
7) That neither any penalty or debarment was made against me nor against the firm in
any way at any Govt./Autonomous Body/Institution.
8) That I am a citizen of India.
Deponent
Solemnly affirmed by the said
before me.
(1st class Judicial Magistrate / Notary Public)

STRUCTURE AND ORGANISATION

Asi I valie of applicant.
A.2 Office Address:
Telephone No. and Cell Phone No. :
Fax No.:
E mail:
A.3 Attach an organization chart showing the structure of the company with names of Key personnel and technical staff with Bio-data. :
Note: Application covers Proprietary Firm, Partnership, Limited Company or Corporation,

Signature of applicant including title and capacity in which application is made.

DI Strap Saddle required for providing house service connections on DI/CI mains.

General specification:

DI Saddle with strap, protection rubber with necessary fitting & fixing to be done according to IS standard as per direction of EIC.

HDPE Pipe for House Service Connection:

Pipes shall be made out of HDPE raw materials, the pipes shall be conforming to 1S:4984-2016, 20mm OD, PE-100, PN 16. (Average 15 m) and as directed by the Engineer In Charge.

Manufacturers test certificate along with raw materials manufacturer's test certificate is mandatory. Random inspection for pipe, fittings, water meter will be carrying out.

COMPRESSION FITTINGS FOR HDPE PIPES:

90 DEG COMPRESSION ELBOWWTH METAL INSERT (Male/Female)
90 DEG COMP ELBOW, with COMPRESSION JOINT BOTH ENDS
FEMALE / MALE THREADED ADAPTER With METAL OFFTAKE
The Compression fittings shall be tested as per below

Type test	Standard
Dimensions of the threads	ISO 7/1
Tightness of the joints	ISO 3458
Tightness of the joints when subjected to bending	ISO 3503
Resistance to pull-out	ISO 3501
Internal under-pressure test	ISO 3459
Long term pressure test	ISO/DIS 14236

FERRULE for House Service connection:

10 mm dia Brass ferrule of ISI marked material approved by EIC upto 450mm long with plumbing joint, brass over C.P. coupling at both ends with cap Confirming to IS 2692/1994(reaffirmed 2005).

Non Return Valve (NRV) for connection of meter.

Tamper proof Flow Control Valve (FCV) cum Non Return Valve (NRV), made with solid steel bar (hexagonal and round) body & SS ball for float option, materials grade of Stainless Steel finished with CNC machining of size not less than 71 mm with connection size: 15mm Dia BSP thread, design and working in float principle (as per CPHEEO manual) including cost of materials, manufacturing, Loading, unloading, transit insurance and transportation. Manufactures must provide third party inspection report from PHE approved/NABL accredited Laboratory. Materials grade of stainless steel made with SS316 Confirming to IS 778 ISI Marked

GI PIPE

G.I pipe of TATA make (medium duly) of 2 metre length with all necessary specials to continue from the end of the HDPE pipe & upto 1.0 m. above ground within the premises of household as per direction of EIC.

BIB Cock & STOP cock

Bib/Stop Cock to be made of alloy iron with Brass Spindle ISI marked material approved by EIC. Bib/Stop cock to be tested 21kg/m2.

ELBOW, NIPPLE, UNION SHORT PIECE ETC. FOR METER CONEECTION FOR EXISTING HSC

All accessories should be ISI marked material (GI) approved by EIC.

15mm CPVC BALL VALVES (STOP TAP) FOR EXISTING HSC

The product shall confirm to IS-15778: 2007 and fitting, fixing should be done as per direction of EIC.

SPECIFICATIONS FOR MULTIJET CLASS - B DOMESTIC/COMMERCIAL WATER METERING SYSTEM (SIZE 15 mm)

Sl. No.	Parameters	Specifications	
1	Meter size and overall dimensions	either side; overall dimensions shall be as per table 2 of IS 779 1994 or table 1 of ISO 4064 (Part 1)	
2	Scope of Application	The meter will be used for the measurement of cold, chlorinated potable water.	
3	Applicable Standards	The meter shall conform to both IS: 779-1994 and ISO: 4064 (Part 1) standards with latest Amendments. The meters would be supplied with BIS / MID Marked and Certification from Weights and Measures (Metrological Control of Water Meters) Regulations, 2014, Government of India.	
4	Meter Type	The meters shall be: Multi-jet Inferential meters Super dry dial Hermitically sealed Class B, preferably 360 degree orientable totalizer.	
5	Protection class	Should confirm to IP68	

6	Accessories	The meter shall include the following accessories: o Two sets of Brass nut and Nipples. o The meter shall be supplied with a tubular strainer in the inlet of the water meter with holes not less than twice the area of Nominal inlet bore of the pipeline to which it is fitted.
7	Flow rate	Minimum, maximum and transition flow shall be as per relevant Standards.
8	Accuracy	The maximum permissible error in the metering accuracy of the meter. when determining as per IS 6784:1984 shall be as under, 1. In the lower region of flow [Qmin (inclusive) to Qt

		(exclusive)]- + 5%
		2. In the upper region of flow [Qt (inclusive) to Qmax (inclusive)]- 2%
9	Pressure and Temperature	Pressure and Temperature shall be in accordance with ISO 4064 Class B and IS 779-1994 and its latest amendments.
10	Pressure Loss	The pressure loss shall be in accordance with ISO 4064 class B, or Clause 10.2 of IS 779-1994 and its latest amendments.
11	Seal	Sealing holes shall be provided and the meter shall be sealed in such a manner as to render it impossible to obtain access to the measuring units including registration box and cap without breaking the seal. The sealing wires shall be of rust free.
12	Material	All the materials used to construct / manufacture customer meters shall confirm to Appendix B of IS 779-1994 or clause 4.7 of ISO 4064 (Part 1) o Plastic used in the manufacture of various components listed under Annexure B shall satisfy all provisions as depicted under Clause No. 6.1.1 of IS 779-1994

13	Construction	 w The meter shall be constructed as per Clause No 7 of IS 779-1994 or relevant clauses of ISO 4064 (Part 1). Each meter will be supplied with two cylindrical nipples or tail pieces with connecting nuts. Threads on the connection shall conform to latest version of IS 2643 (part 1 to 3) or ISO 228-1. All meters shall be supplied with an easily removable tubular inlet strainer. The seal & Sealing wires shall be rust proof material. Meter size & overall dimension of meter shall conform to Clause No 9 of IS 779-1994 or relevant clauses of ISO 4064 (Part 1) Connections: The meter casing shall be fitted in the pipeline by means of two cylindrical nipple or tail pieces with connecting nuts which shall be provided with each meter. The theads on connections shall conform to IS 2643 (Part 1 to 3)-1975 Impeller and Piston: Impeller and impeller shaft assembly shall rest on a self-lubricating bearing which has as low frictional resistance as possible. Impeller chamber &Measuring Chamber: The impeller chamber and measuring chamber shall be rigid and shall not change its form as a result of internal stress or with use. Dial: The dial shall be of vitreous enamel power coated on copper ensuring indestructible marking and good legibility. Indicating Device: Indicating Device shall be able to record 9999 k1(min) for meter size up-to 25mm. The kilo litres and its multiple shall be indicated in black and sub multiple of kilo litres in red. For digital indicator, the visible displacement of all digits shall be upward in value. The unit symbol 'KILO LITRES' shall appear in the immediate vicinity of digital indications. Frost Protection: Meter liable to damage by frost shall be suitable protected.

designed in such a way that if the totalizer protective glass is broken for a reason or another the totalizer cannot be removed			
Mechanical Meter O It shall be of straight reading type. O The totalizer shall register in cubic meter units. O The totalizer shall consist of a row of minimum four on-line consecutive digits to read at least 9999 m3 as per ISO 4064/ IS 779-1994. O Another three digits or pointers shall register flows in litres and be of a red colour. O The totalizer or any part of it shall be capable of being repaired. O Metal can mineral glass envelop. O The totalizer must be suitable for test on an electronic test bench. O The protection class of the totalizer should be IP 68. The totalizer shall be designed in such a way that if the totalizer protective lens / material are broken from any reason, the totalizer cannot be removed from its place. It shall consist of a row of minimum four on-line consecutive digits to read at least 9999 KL as per IS 779-1994. It preferably be capable of 360 degree orientation for ease in reading. The pivot of the impeller should be guaranted against any corrosion or damage for at least three years after the first installation. The impeller chamber shall be resistant to corrosion and it will confirm to 15779:1994/MID. Resistance to Weather Conditions The manufacturer must carried out all test as specified in Clause No. 12 of IS 779-1994 or relevant clauses of ISO 4064 (Part 1) or MID by a recognized testing authority. The Report of test shall be furnished in accordance with IS 6784-1984. However, the manufacturer / Supplier is liable carry out life Test as per Clause 12.4.4 of IS 779-1994 from any reputed testing authority like 'Fluid Control Research Institute' at his own cost from the lot of supplied meters. Lot size is to be determined on the basis of Table 4 of IS 779-1994. On the basis of Test Result, manufacturer / Supplier shall be liable to change defective meters or whole lots as the case may be at his own cost from the lot of supplier shall be marked / embossed with the following.			o The totalizer metal can mineral glass envelop, shall be designed in such a way that if the totalizer protective glass is broken for a reason or another the totalizer cannot be removed from its place. The totalizer protective cover shall be made of sturdy glass and shall have a thickness of not less than 5mm. Sturdy glass is defined as the ability of the counter protection
14 Mechanical Meter O The totalizer shall register in cubic meter units. O The totalizer shall consist of a row of minimum four on-line consecutive digits to read at least 9999 m3 as per ISO 4064/ IS 779-1994. O Another three digits or pointers shall register flows in litres and be of a red colour. O The totalizer or any part of it shall be capable of being repaired. O Metal can mineral glass envelop. O The totalizer should be of open type. O The totalizer must be suitable for test on an electronic test bench. O The protection class of the totalizer should be IP 68. The totalizer shall be designed in such a way that if the totalizer protective lens / material are broken from any reason, the totalizer cannot be removed from its place. I the shall consist of a row of minimum four on-line consecutive digits to read at least 9999 KL as per IS 779-1994. It preferably be capable of 360 degree orientation for ease in reading. The pivot of the impeller should be guaranted against any corrosion or damage for at least three years after the first installation. The impeller chamber shall be resistant to corrosion and it will confirm to 15779-1994/MID. Resistance to Weather Conditions Resistance to Weather Conditions The manufacturer must carried out all test as specified in Clause No. 12 of IS 779-1994 or relevant clauses of ISO 4064 (Part 1) or MID by a recognized testing authority. The Report of test shall be furnished in accordance with IS 6784-1984.
